

## PRO-Clean™ | Surface Protein Residue Test

PRO-Clean™ quickly and accurately monitors the cleanliness of surfaces to help ensure product quality by detecting protein residues left behind after cleaning. Simply swab a surface, release the reagent, and if protein residue is present the reagent will turn purple. The more contamination present, the quicker and darker the color change to purple. PRO-Clean quickly validates the hygiene of a surface, allowing immediate corrective action to be taken if necessary.

### Benefits:

- Results in 1-10 minutes
- Easy-to-interpret color change – no instrumentation needed
- Unique liquid stable chemistry produces consistent results
- Pre-moistened swab provides reliable collection, recovery, and detection to ensure consistent results
- Low carbon footprint devices are 100% recyclable
- 18-month shelf life at room or refrigerated temperatures (2 - 25 °C)

### Sensitivity:

- Detects 80 µg protein after 1 minute
- Detects 50 µg protein after 5 minutes
- Detects 20 µg protein after 10 minutes
- Disregard any color change after 10 minutes

### Color Results:

Catalog No.
